VESSEL REPORT ON OBSERVER

To ensure contracted observers maintain a high level of professionalism, observer placement and debriefing procedures continue to be improved. Vessel operators can further assist by reporting on unsatisfactory behaviour or favourable impression of observers they host.

Operators are especially encouraged to report on suspected severe wrongdoing as soon as possible after returning an observer to port, so that a timely investigation can be made.

Please use the reverse-side form to fax such report to the fishery authority that placed the observer
