

Fish and Shark pictures

Posted by Joe Arceneaux - 2011/11/29 01:29

We have a very large collection of photos taken by observers working on pelagic longliners in the Hawaiian area and American Samoa EEZ. They are of differing qualities, but many are good for slide show presentations. They are not likely high enough resolution for print job. We also have many pictures of sea turtles and certain marine mammals.

If interested, please contact me.
