

First TUFMAN Training Workshop (TTW-1)
3-7 December 2012
SPC, Noumea, New Caledonia

Session 8.2

Licensing Reports

INTRODUCTION

TUFMAN offers users a number of pre-formatted reports to help them account for the data that has been entered into the database. These reports are all accessed from the 'Reports' button on the main TUFMAN menu.

Reports can be produced in two different formats .

- A nicely formatted PDF version, which can be used directly in written reports and ;
- An Excel format which can be used to further manipulate the report layout or data

Things to know before you start

Run post entry processing – the first step in reporting

To ensure that the data is up-to-date and fully linked (see XX) you are advised to always run processing before you produce any reports. The run processing can take a while, especially if new data has been running, so leave time to do this. Luckily TUFMAN is set up in a way that should remind users with at the top of the reports sub-menu.

The screenshot shows the 'REPORTS' menu with 'Post-entry Processing' selected. The main area contains the following processing jobs:

Linking Processes	Generate estimates	Miscellaneous
Generate Links from licenses to other data types	Estimate catches where missing in logsheet data	Update the sub-area code for reports
Generate Links from NATIONAL FLEET to other data types	Estimate hooks where missing in logsheet data	
Generate Links amongst data types for LONGLINE gear	Raise catches in logsheets from unloadings data	
Generate Links amongst data types for PURSE SEINE gear	Generate Trips Coverage data	
Generate Links amongst data types for POLE-AND-LINE gear		

RUN ALL PROCESSING JOBS

Reports Sub-menu

Reporting Data Parameters

Select the range of data you want to report on. For instance; which gear type, fleet, dates and fishing area. For some reports you will also be asked to choose the fishing company or vessel name.

TUMFAN will highlight the data ranges (or reporting parameters) that must be filled in.

The screenshot shows a web-based reporting interface with the following sections:

- Gear:** A dropdown menu for selecting gear type.
- Time:** Fields for 'Date from' (01-Jan-2012) and 'to' (31-Dec-2012), a 'Year' field (2012), and a 'Group by' dropdown (Year).
- Company / Vessel / Trip:** Three dropdown menus for 'Select Company', 'Select Vessel', and 'Select Trip (Date)'. The 'Select Trip (Date)' dropdown is highlighted in red.
- Nationality of Catch:** A section with a checked 'National Fleet' option and a '(Licensed vessels only)' note. Below are 'Company Nationality' and 'Flag of registration' checkboxes, both with arrows pointing to a shared dropdown menu.
- Area:** Three unchecked checkboxes: 'EEZ waters only?', 'Sub Area breakdown?', and 'EEZ breakdown?'.
- Buttons:** 'Run Report' and 'Run and Open in EXCEL' (highlighted in red).

Notes on the data parameters

TIME – Group by

When Year is selected TUMFAN will report the data for the whole year

When 'Month' is selected TUMFAN will report the data for every month

When Quarter is selected TUMFAN will report the data for every quarter (i.e. January – March etc)

AREA

When EEZ Area is selected TUMFAN will report the data for the home EEZ only

Sub Area Breakdown is selected TUMFAN will report the data for specific areas. This is not relevant for most countries but Kiribati uses it for its three main island areas.

EEZ Breakdown is selected TUMFAN will report the data for every EEZ that the vessel was fishing in.

Report description

This report gives a list of all the Agreements for a particular year, in company/ association alphabetical order. The report outlines the main attributes of each Agreement (i.e. the Agreement number and Agreement I.D, the reporting period, licence type and total number of licences that were issued.)

Things you should know and check for before using this report.

An Agreement may appear more than once during a calendar year. If for example an Agreement terminates during the selected year and then another new Agreement starts immediately after. If an Agreement is active at any point during the selected year, it will be selected in this report, regardless of whether it was (i) inactive at the start of the calendar year, or (ii) inactive at the end of the calendar year. All Agreement and all licence information must be entered to get a complete "List of

Agreements report”. The ‘Agreement details form’ and the ‘Licence details form’ must be fully filled in.

Check that the agreement and licencing data entry is complete and correct before producing this report.

Go to → Licence sub-menu → Agreement → New Agreement → Agreement detail form

Go to → Licence sub-menu → Licence → New Licence → Licence detail form

What is this report useful for?

This is the best summary report if you require information on Agreements. The report also sums up the total number of licences issued for each Agreement during the year. This is a good report to refer to when you are preparing internal work report or more general reports like your National Fishery Status Report for SC. It is also a useful report when preparing ‘Access Negotiation Briefs’. By changing the year of this report you can prepare historical Agreement information, and summary (but not detailed) historical licensing information.

Similar reports

Report 3-a: Licence list by Agreement for a selected year.

Licensing Report 2

Title: Registrations

What does this report look like?

?? Not in TUFMAN TRAINING database-

Report description

This report gives a list of all vessels that have been registered for a particular year, in company/ association alphabetical order. The report outlines the main attributes of each Registration (i.e. the national registration number, the sequence number and the registration dates —start /end and the issue date). You can select a specific company / association by using the reporting parameters.

Things you should know and check for before using this report.

**Most countries do not register their vessels, so for the majority of countries this report will be blank. Currently only Kiribati and FSM register their vessels in this manner.*

All agreement and all registration information must be entered to get a complete “List of Registrations by Agreements” report. The ‘Agreement details form’ and the ‘Registration details form’ must be fully filled in.

Check that the agreement and licensing data entry is complete and correct before producing this report.

What is this report useful for?

This is the only report that gives information about Registration details

Similar reports

None

Report Description

3a - This report gives summary licence information for each Agreement, for the selected year, in company/ association alphabetical order. The vessel name, the licence number and the status of the licence including the start and end date as well as the issue date are all displayed in this report. You can select a specific company / association by using the reporting parameters.

3b - This report gives summary licence information for each fishing company, for the selected year, in company / association alphabetical order. Alternatively, you can choose this report over a number of years, and / or for a specific fishing company by inputting the required parameters at the end of the page. The vessel name, the licence number and the start and end date as well as the type of licence issued are all displayed in this report.

3c - This report gives a list of the licensed vessels for the selected year ordered by the gear and then by the vessel's nationality, for the selected year.

Things you should know and check for before using this report.

3a -An Agreement may appear more than once during a calendar year. If for example an Agreement terminates during the selected year and then another new Agreement starts immediately after. If an Agreement is active at any point during the selected year, it will be selected in this report, regardless of whether it was (i) inactive at the start of the calendar year, or (ii) inactive at the end of the calendar year.

3b – A licence may appear more than once during a calendar year. If for example a licence terminates during the selected year and then another new licence starts immediately after. If a licence is active at any point during the selected year, it will be selected in this report, regardless of whether it was (i) inactive at the start of the calendar year, or (ii) inactive at the end of the calendar year.

3c - If a licence is active at any point during the selected calendar year, it will be shown in this report. Regardless of whether it was (i) inactive at the start of the calendar year, or (ii) inactive at the end of the calendar year.

What is this report useful for?

3a -This report will be used as an internal administrative report to give information about licences issued under one or all Agreements. This report can be used to check that any limit put on the number of licences, as set by the Agreement, has been adhered to. The report can be referred to when preparing Access Negotiation Briefs, as it may be set to show how many vessels were licensed under the Agreement in the past. This report may also prove useful if sent to the company / association if they require an up-dated list of all the vessels that have licences for the chosen year. The individual company / association should be selected in the reporting parameters.

****This report is a useful data quality check for licencing data entry.**

3b - This report is useful internal administrative report when preparing other reports i.e. quarterly work reports or Access Negotiation Briefs for instance. It may be useful to prepare this report for a particular company/ fishing association. In that case the company / association can be selected in the reporting parameters.

**This report is a useful data quality check for licensing data entry.

3c - The report will be produced when information is required about licences for each gear type. Normally this type of information will be required for internal administration reports, or for reports describing the fishery (i.e. ad-hoc requests from consultants.)

Report Description

4a - This report gives comprehensive information on vessels that are currently licensed for each company / association in alphabetical order. It is date-stamped at the top of the report, so the report is only valid on the day it is produced. The report details the type of licence, the vessel name the FFA vessel identification number, the licence number and the status of the licence (you can see if the vessel licence has been suspended, cancelled or re-instated at any point during the report dates), the licencing dates and all the fees related with each licence.

4b - This report gives a complete list of all vessels that are licensed to fish. It is only valid on the day it is produced. The report is ordered by Call-Sign, as this compulsory vessel marking is easily seen by government officials even if they are far away from the vessel.

4c -

4d -

What can this report be used for

4a - This report is useful for verifying the list of current licences that are licensed to a specific company on the day. It may be helpful if there are any requests on licensing from the fishing company, or if a compliance officer is going to visit a company and requires current licencing

information. This report can also be used to check for licensing data entry and should be produced periodically.

4b- This report is best used by monitoring and compliance personnel during times of national and/or sub-regional surveillance operations. Your compliance department may request this information before or during their surveillance trips. This report will be requested by FFA on a regular basis.

4c -

4d -

Things you should know and check before using this report

These reports are only valid on the day that it is produced. Licensing data should be checked regularly to ensure that this report is correct on the day that it is used. It is too late to start checking for errors in this report on the day it is required.

License Reports 5 – Licensing Summary

Title :

Report Description

5a - This report gives a quick summary of the total number of vessels licensed during the selected year, for each company association, in alphabetical order. Alternatively, you can choose this report over a number of years, and / or for a specific fishing company by inputting the required parameters at the end of the page. The year, the gear, the company nationality the total number of vessels and the total number of licences are all displayed in this report.

5b - This report gives a quick summary of the total number of vessels licensed during the year for each vessel nationality, in alphabetical order. Alternatively, you can choose this report over a number of years, and / or for a specific fishing company by inputting the required parameters at the end of the page. The year , the gear, the vessel nationality, the total number of vessel, and total number of licences are all displayed in this report.

5c -

5d -

5e-

What are these reports useful for?

5a- It is useful to refer to this report when brief information on licensing is required. This may be when compiling other reports like your internal annual or quarterly work reports. You may get ad-hoc request for this information from visiting consultants etc.

5b - It is useful to refer to this report when compiling other reports or if brief information about licensing is required (like a quarterly work report or annual work reports, for instance). This is the best licensing report if information on licences by vessel nationality is required. You may get requests from external departments (finance, immigration etc) looking for a breakdown of vessel nationalities.

Things you should know and check before using this report

5a - If a licence is active at any point during the selected calendar year, it will be shown in this report. Regardless of whether it was (i) inactive at the start of the calendar year, or (ii) inactive at the end of the calendar year.

For instance you may get 10 under the vessels column and 12 under the licences column for the same company / association. This means that one vessel was issued with more than one licence during the year. These may have been a 3- month licences for instance.

Check that the agreement and licencing data entry is complete and correct before producing this report.

5b - If a licence is active at any point during the selected calendar year, it will be shown in this report. Regardless of whether it was (i) inactive at the start of the calendar year, or (ii) inactive at the end of the calendar year.

Report (s)6 – Receipts

Report Description

6a- The report shows all the monetary receipts (i.e. money shown as received on bank statement) that have not been allocated or linked to a specific vessel licence for a selected year, in company alphabetical order. Alternatively, you can choose this report for a number of years, and / or for a specific fishing company by inputting the required parameters at the end of the page.

6b- The report shows all the licences that do not had any receipts (i.e. money received) linked to them, suggesting that these licences have not been paid for. This report is, in some ways, the opposite to report 6-a. The report is ordered by company, in alphabetical order. You can select one company by using the report parameters.

6c- This report shows the total payments (under the remittance reference number) made by the company/ assocn during the calendar year. It also shows how these payments should be allocated (i.e. a proportion for the licence fee, a proportion for the observer fee etc) and finally it shows how the payments were allocated. This report can be seen as a 'balance sheet' for licencing fees as it displays the agreed fees and the fees that have been paid.

6d- This report gives a summary of all the licencing fees that were due to be paid and along with the licence fees that have been paid.

6e-

6f-

What is this report useful for?

6a- The report is best used as a data quality report to ensure that all monies that have been paid by the fishing company have been allocated to the correct licence. This will help to ensure that every issued fishing licence has been fully paid for.

6b- The report is best used as a data quality check to ensure all licences have been paid for. The report helps to ensure that receipts have been correctly attributed to the licences they were sent to pay for.

6c- This report is best used as a data quality report for licencing fees. Check that the total amount in each column are the same, and check that the individual amounts in the 'agreed allocation' column are the same as the individual amounts in the 'received allocation' column.

6d- This is a good internal summary report that shows what the total licence fees should be from each Fishing Agreement and whether the agreed sum has already been paid or not. Most likely this information will be asked for by your supervisor or Director.

6e-

6f –

Things you should know and check before using this report

6a- The aim is that this report will be blank! If this report does show up blank then all the money that has been sent to pay for fishing licences has been correctly linked to the correct fishing vessel.

6b- The aim is that this report will be blank! If this report is blank then all licences have been paid for and the source of the money properly identified (i.e. date of receipt at bank, receipt number).

6c- If a licence is active at any point during the selected calendar year, it will be shown in this report. Regardless of whether it was (i) inactive at the start of the calendar year, or (ii) inactive at the end of the calendar year. This report should be produced regularly and the inconsistencies rectified in the data entry screens

6d- If an agreement is active at any point during the selected calendar year, it will be shown in this report. Regardless of whether it was (i) inactive at the start of the calendar year, or (ii) inactive at the end of the calendar year. This report should be produced regularly and the inconsistencies rectified in the data entry screens

What are these reports useful for?

7a- This is one of two reports that can show the total revenue (or amount) of money that was received from the fishing licences during the year. This report is displayed by vessel nationality and will be used when there is a request for the total revenue gained from licencing by vessel nationality. This report will typically be used to meet internal administrative requests regarding the total fees generated by licensing. Other government departments (finance, economics policy) may also request this report.

7b- This is one of two reports that can show the total revenue (or amount) of money that was received from the fishing licences during the year. This report is displayed by vessel nationality and will be used (typically for internal reporting) when there is a request for the total revenue gained from licencing by gear type.
